

Our new school building only opened a few short years ago and since then it has grown with incredible speed. Parents, students and the local community have quickly come to trust the name Maxton Strong School; as a result our student base has increased at a far greater speed than we ever could have imagined. You can learn more about our school, student growth projections and activities via the button below.

## Campus Expansion Plan

Since our visit from EMI we have begun to see our vision for the school take shape, first with the construction of a double story Science Wing extension, then the completion our Learning Resource Center and now the construction of our Kindergarten. Reflected by the expansion of the physical school building we have seen excellent growth in our student body numbers too!

### Phase 1: Learning Resource Center (Complete)

To assist in the overall educational experience of both our Primary, Secondary and Senior Secondary students our LRC contains both a library and computer lab; the lab is designed to incorporate 35 computers and a digital projector. The library has 2 large rooms for book stacks (one for junior and one for senior students), a large reading room, a computer section, newspaper and magazines area and a large work area for the librarian.

In 2016 funding was received for the construction and in 2018 work on the LRC was completed. We are happy to report that the new space is being used daily by our students and has become an integral part of our campus.

### **Phase 3: Senior Secondary School**

The most ambitious stage of our journey is the construction of our High School and Secondary/Senior Secondary facility. Containing all our major science labs, a second computer lab, classrooms, our administration area and several common rooms it will be the largest building on campus. Designed to intentionally create a protected space within the campus the Senior Secondary School will be open and airy, filled with natural light.

With faith and dedication, we are launching into the planning and fundraising process for this project, and are excited at the possibilities that lie ahead of us. The educational opportunities that our school is and will be providing to students will go a long way to breaking the cycle of poverty in our local area.
